

HORSESHOE METALS LIMITED

ASX ANNOUNCEMENT

31 October 2023

QUARTERLY ACTIVITIES REPORT

QUARTER ENDED 30 September 2023

Horseshoe Metals Limited (ASX: HOR) (**Horseshoe, HOR or the Company**) is pleased to present its Quarterly Activities Report for the period ending 30 September 2023.

HIGHLIGHTS

- **Horseshoe continues to systematically advance the Horseshoe Lights copper-gold system in WA**
- **Continued to evaluate historic DSO stockpiles to unlock early cash flow opportunities – sampling of surface stockpiles completed during the quarter and presented to potential offtake partners for review**
- **Surface material assays up to 40.3% copper in chalcocite/digenite**
- **Composite samples collected for customer assessment assay up to 39.0% copper**
- **DSO offtake negotiations have commenced including potential offtake and/or project funding**
- **Discussions with an experienced group regarding potential oxide heap leach trials at Horseshoe Lights are progressing (subject to relevant approvals)**
- **Horseshoe management continues to evaluate the Bryah Basin region for strategic tenement and project opportunities**
- **Previous drilling has demonstrated clear expansion potential at depth in historically overlooked zones of mineralisation**
- **Follow-up site activities focused on advancement of DSO strategy planned this quarter**

Commenting on progress made during the September quarter, Director Kate Stoney said: "Our primary focus during the quarter was on pursuing our strategy to generate early cash flow from the Horseshoe Lights Project through the sale of our high-grade DSO stockpiles.

Work completed during the quarter included surface sampling of these high-grade stockpiles and provision of this test ore to potential offtake customers. The feedback from these samples has been very encouraging and supports our near-term DSO plans.

Our team also continues to systematically assess the ground surrounding our project, with a particular interest in ground located immediately north-east of Horseshoe Lights. Further site activities to advance the DSO strategy are planned this quarter and we look forward to reporting on a busy pipeline of activity for the remainder of the calendar year."

Exploration & Development Summary

Western Australia

Horseshoe Lights Copper-Gold Project, Western Australia

(HOR: 100%)

Project Summary

The Horseshoe Lights Copper-Gold Project is the original Cu/Au VMS discovery in the Bryah Basin and is located approx. 60 km west of DeGrussa Copper Mine owned by Sandfire Resources (ASX: SFR).

Past production from Horseshoe Lights includes around **316,000 oz Au & 55 kt Cu metal** in two phases of mining and the deposit contains a current in situ resource **128 kt Cu metal @ 1.0% (0.5% cut-off) and 36,000 oz Au** (refer Table 1).

Figure 1: Location of Horseshoe Lights and Kumarina Projects, WA

September Quarter Exploration Activity & Future Strategy

During the quarter, the Company continued to systematically advance the Horseshoe Lights copper-gold system in WA. A summary of the key activities completed during the quarter is outlined below.

DSO Strategy and Sampling of High-Grade Surface Stockpiles

The Company completed further evaluation of historic DSO stockpiles to unlock potential early cash flow opportunities for the business. Further sampling of these surface stockpiles was completed during the quarter and presented to potential offtake partners for review.

Past production from Horseshoe Lights includes around **316,000 oz Au & 55 kt Cu metal** in two phases of mining, and the deposit contains a current *in situ* resource **128 kt Cu metal @ 1.0% (0.5% cut-off) and 36,000 oz Au** (refer Table 1).

Significantly the copper phase of mining included early DSO copper production that has left subgrade and rehandle DSO material around the site. Areas identified and assessed as having future DSO potential include, M15, Subgrade and C20 stockpiles along with rehandle and surface pimple dumps located on the North Waste dump, Gold tailings and Southern low-grade stockpile.

Post quarter end (see ASX announcement dated 31 October 2023), the Company reported that surface grab samples had been collected to confirm grade as well as a 27kg composite sample source from various stockpiles around the site. The composite sample was delivered to Nagrom for compositing, crushing and analysis. Sub-samples of this composite have been provided to potential customers for assessment who have expressed strong interest in purchasing the material. **This material is identical to the historically produced and sold DSO material.**

The grab samples assay up to 40.3% copper and the stockpile composite assays up to 39.0% copper. The DSO material occurs in a wide range of sizes from boulders to fines. The coarse material is easily scavenged utilising loaders and excavators equipped with sieve buckets.

The surface materials have previously been broadly grouped as follows:

Copper - Gold	Flotation tailings, Vat 2, M15/C20 Stockpiles and North Dump
Copper	Subgrade, rehandle, Low-grade oxide and sulphide stockpiles
Gold	Gold tailings, leach vats, low grade, rehandle and ROM stockpiles

Further details on the Company's surface sampling and DSO strategy can be found in the ASX announcement dated 31 October 2023.

Assessing Strategic Opportunities in the Basin

During the quarter, Horseshoe's management continued to evaluate the Bryah Basin region for new strategic tenement and project opportunities.

As part of this process, the Company has been systematically evaluating the ground surrounding our project in the basin, with a particular interest in the ground located immediately north-west of Horseshoe Lights. Horseshoe's technical team is confident there may be potential extensions of the Horseshoe Lights system in this area to the north-west within the company's exploration licences and a strategy to further investigate this potential is currently being developed.

Oxide Heap Leach Strategy

Discussions with a group experienced in oxide heap leaching regarding potential trials at Horseshoe Lights are progressing (subject to relevant approvals). As part of this process, Horseshoe continues to review previous scoping study results to incorporate potential treatment of oxide via heap leach followed by SXEW or copper cementation. A site visit will be undertaken during the December quarter to assist these studies and the DSO strategy outlined above.

Next steps

The following activities at Horseshoe Lights are planned over the coming months:

- Continues to advance and review strategic and complementary opportunities in the Bryah Basin
- Advancing the DSO strategy including discussion with potential partners
- Further studies with respect to the oxide heap leach potential
- Additional metallurgical test work on oxide copper stockpiles and targets
- Gravity recovery test work on Copper Flotation and CIP tailings

Horseshoe West, Western Australia (HOR: 100%)

The Horseshoe West tenements are located approximately 1.5 km west of the Company's existing Horseshoe Lights copper-gold deposit and are considered prospective for Horseshoe Lights style Volcanogenic Massive Sulphide (VMS) copper-gold and shear-zone hosted gold mineralisation.

No active field work was undertaken during the September quarter.

Kumarina Copper Project, Western Australia (HOR: 100%)

The Kumarina Project consists of a mining lease and mining lease application covering approximately 3.2 km². The Project is located 95 km north of Sandfire Resources NL's DeGrussa copper-gold mine in the Gascoyne region of Western Australia. The Company has applied for a mining lease (MLA52/1078) to cover the Rinaldi resource, contiguous with M52/27. The Company continues to progress a Project Agreement as part of the application process with the Native Title Party and its lawyers.

No active field work was undertaken during the September quarter.

South Australia

Glenloth Gold Project, South Australia (EL6301 and rights to explore and develop ML5848, ML5849, ML5885 & MPL62)

The Glenloth Project is located in the Central Gawler Craton of South Australia. The project consists of a single exploration licence, EL 6301, which comprises two areas totalling 107 km². The larger eastern block *Glenloth* covers 81 km² and includes the Glenloth Goldfield and part of the Harris Greenstone Belt. The smaller western block *Old Well* takes in the northern trend of the 1.0M oz Tunkillia gold deposit located 6 km to the south, under development by Barton Gold Holdings Ltd (ASX:BGD). The Company also holds the rights to explore and develop ML 5848, ML 5849, ML 5885 and MPL 62 within the eastern block of EL 6301.

At Glenloth gold occurrences typically consist of relatively thin (ca. 1 m width), high-grade mineralised quartz veins, hosted by sheared and fractured Archaean to Paleoproterozoic Glenloth Granite, and contacts with dolerite dykes. A shallow Hiltaba Suite batholith has been proposed as the source of mineralisation. Six kilometres south of Old Well, the Tunkillia deposits (Areas 223, 191, 51) are characterised by a large hydrothermal system associated with the Yarlbinda Shear Zone, which passes into the Old Well tenure.

No active field work was undertaken during the September quarter.

Corporate

Horseshoe Lights royalty

During the quarter, Vox Royalty Australia Pty Ltd, a wholly owned subsidiary of the Vox Royalty Corporation (TSE:VOXR), completed the acquisition of a 3% net smelter return royalty over production at Horseshoe Lights from Horseshoe Gold Mine Pty Ltd, a wholly owned subsidiary of Grange Resources Limited (ASX:GRR). Vox has assessed annual royalty revenue potential from Horseshoe Lights of CAD\$1-2M for a period of up to six years (refer TSE release 12 September 2023).

Listing Rule 5.3.5 disclosures

The amount of payments to related parties and their associates disclosed in section 6.1 of Appendix 5B accompanying this report was approximately \$130,000. This consisted of payments to Directors totalling \$24,000 for directors' fees, superannuation and company secretarial fees, as well as payments to Target Exploration Pty Ltd (an entity of which Ms Kate Stoney is a director) of approximately \$106,000 for exploration management, technical consulting services, and corporate and administrative services.

The Board of Directors of HOR has authorised this announcement to be given to the ASX.

About Horseshoe Metals Limited

Horseshoe Metals Limited (ASX:HOR) is a copper and gold-focused company with a package of tenements covering approximately 500 km² in the highly prospective Peak Hill Mineral Field, located north of Meekatharra in Western Australian and mineral interests in South Australia. The Company manages the Horseshoe Lights Project and the Kumarina Project in Western Australia, and the Glenloth Gold Project in South Australia.

About the Horseshoe Lights Project

The Horseshoe Lights Project includes the historic open pit of the Horseshoe Lights copper-gold mine which operated up until 1994, producing over 300,000 ounces of gold and 54,000 tonnes of contained copper including over 110,000 tonnes of Direct Shipping Ore (DSO) which graded between 20-30% copper.

The Horseshoe Lights ore body is interpreted as a deformed Volcanogenic Hosted Massive Sulphide (VMS) deposit that has undergone supergene alteration to generate the gold-enriched and copper-depleted cap that was the target of initial mining. The deposit is hosted by quartz-sericite and quartz-chlorite schists of the Lower Proterozoic Narracoota Formation.

Past mining was focused on the Main Zone, a series of lensoid ore zones, which passed with depth from a gold-rich oxide zone through zones of high-grade chalcocite mineralisation into massive pyrite-chalcocopyrite. To the west and east of the Main Zone, copper mineralisation in the Northwest Stringer Zone and Motters Zone consists of veins and disseminations of chalcocopyrite and pyrite and their upper oxide copper extensions. The table below summarises the total Mineral Resources for the Horseshoe Lights Project at the reporting date.

TABLE 1 HORSESHOE LIGHTS PROJECT SUMMARY OF MINERAL RESOURCES as at 30 September 2023								
Location	Category	Tonnes (Mt)	Cu (%)	Au (g/t)	Ag (g/t)	Cu metal (tonnes)	Au metal (oz)	Ag metal (k oz)
In-situ Deposit (0.5% Cu cut-off grade)	<i>Measured</i>	1.73	1.04	0.0	0.5	18,000	1,900	28.8
	<i>Indicated</i>	2.43	0.95	0.0	0.7	23,200	3,400	52.2
	<i>Inferred</i>	8.69	1.01	0.1	2.6	87,400	30,700	712.4
	Total	12.85	1.00	0.1	1.9	128,600	36,000	793.4
Flotation Tailings	Inferred	1.421	0.48	0.34	6.5	6,800	15,300	294.8
M15 Stockpiles	Inferred	0.243	1.10	0.17	4.7	2,650	1,300	36.7
Note: At 0% Cu cut-off grade unless otherwise stated					TOTAL	138,050	52,600	1,124.9

The above Mineral Resource Estimates all meet the reporting requirements of the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

About the Kumarina Project

The copper deposits at the Kumarina Project were discovered in 1913 and worked intermittently until 1973. The workings extend over nearly 5km as a series of pits, shafts and shallow open cuts. At the main Kumarina Copper Mine, the workings are entirely underground with drives from the main shaft extending for some 200 m in the upper levels and for about 100 m in the lower levels at a depth of 49m below surface.

Incomplete records post-1960s make it difficult to estimate the total copper production from the workings. However, indications are that the Kumarina Copper Mine was the second largest producer in the Bangemall Basin group of copper mines. Recorded production to the late 1960s is 481 t of copper ore at a high-grade of 37.0% Cu and 2,340 t at a grade of 17.51% Cu. An initial Mineral Resource Estimate for the Rinaldi deposit was completed by the Company in 2013 (see 30 June 2013 Quarterly Report announced on 31 July 2013). The total Measured, Indicated and Inferred Mineral Resource Estimate at the reporting date is shown in the table below.

TABLE 2 KUMARINA PROJECT SUMMARY OF MINERAL RESOURCES as at 30 September 2023				
Location	Category	Tonnes (t)	Cu (%)	Cu metal (tonnes)
Rinaldi Prospect (0.5% Cu cut-off)	<i>Measured</i>	<i>415,000</i>	<i>1.46</i>	<i>6,100</i>
	<i>Indicated</i>	<i>307,000</i>	<i>1.16</i>	<i>3,500</i>
	<i>Inferred</i>	<i>114,000</i>	<i>0.9</i>	<i>1,000</i>
	Total	835,000	1.3	10,600

The Mineral Resource Estimate meets the reporting requirements of the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve

Forward Looking Statements

Horseshoe Metals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Horseshoe Metals Limited, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever. This announcement may contain forward-looking statements that are subject to risk factors associated with gold exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

Competent Persons Statement

The information in this report that relates to the Exploration Results and Mineral Resources at the Horseshoe Lights and Kumarina Projects is based on information reviewed by Mr Craig Hall, who is a member of the Australian Institute of Geoscientists. Mr Hall is a director of and contractor to Horseshoe Metals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)'. Mr Hall consents to the inclusion of the data in the form and context in which it appears.

The information in this report that relates to the Horseshoe Lights Project In-situ Mineral Resources is based on information originally compiled by Mr Dmitry Pertel, an employee of CSA Global Pty Ltd, and reviewed by Mr Hall. This information was originally issued in the Company's ASX announcement "40% increase in Copper Resource at Horseshoe Lights Copper/Gold Project", released to the ASX on 5 June 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company's ASX release "Quarterly Report Period Ended 30 June 2013", released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Horseshoe Lights Project surface stockpile Mineral Resources is based on information compiled by a previous employee of Horseshoe Metals Limited and reviewed by Mr Hall. The information was previously issued in announcements released to the ASX on 26 February 2015 and 9 March 2015. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Kumarina Project (Rinaldi Prospect) Mineral Resources is based on information compiled by or under the supervision of Mr Robert Spiers, an independent consultant to Horseshoe Metals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd), and reviewed by Mr Hall. The information was originally issued in the Company's ASX announcement "Horseshoe releases Maiden Mineral Resource Estimate for Kumarina", released to the ASX on 4 March 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company's ASX release "Quarterly Report Period Ended 30 June 2013", released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

8.6	Total available funding (item 8.4 + item 8.5)
	1,100
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)
	3.36
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?
	N/A
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?
	N/A

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 October 2023

Authorised by: By the board.
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
